In the 14 years since Sierra Club Books published Theodore Roszak, Mary E. Gomes, and Allen D. Kanner's groundbreaking anthology, *Ecopsychology: Restoring the Earth, Healing the Mind*, the editors of this new volume have often been asked: Where can I find out more about the psyche–world connection? How can I do hands–on work in this area? Ecotherapy was compiled to answer these and other urgent questions. Ecotherapy, or applied ecopsychology, encompasses a broad range of nature–based methods of psychological healing, grounded in the crucial fact that people are inseparable from the rest of nature and nurtured by healthy interaction with the Earth. Leaders in the field, including Robert Greenway, and Mary Watkins, contribute essays that take into account the latest scientific understandings and the deepest indigenous wisdom. Other key thinkers, from Bill McKibben to Richard Louv to Joanna Macy, explore the links among ecotherapy, spiritual development, and restoring community. As mental–health professionals find themselves challenged to provide hard evidence that their practices actually work, and as costs for traditional modes of psychotherapy rise rapidly out of sight, this book offers practitioners and interested lay readers alike a spectrum of safe, effective alternative approaches backed by a growing body of research. Previous ed. / edited by Philippe Sands. London : Butterworths, 1999 This practical guide, written by experts in mental health nursing, is designed to support healthcare practitioners in checking the physical health of people with severe mental illness (SMI). As life expectancy is reduced by 12 to 19 years in people with SMI, this patient group should receive a physical health check at least once a year. Yet many mental health practitioners have not been trained to assess their physical health needs, and even when such training is offered it may be difficult to access it because of clinical workloads. The Health Improvement Profile (HIP) provides an efficient, effective, evidence- based physical health check tool specifically designed to be used when assessing people with SMI. It supports practitioners in identifying physical health problems and guides them towards evidence-based interventions to address common health issues affecting people with SMI, ranging from cardiovascular disease to lifestyle factors such as diet, alcohol and smoking. Contents include: Introduction What is severe mental illness? What treatments are used in severe mental illness? Systems of the body that are commonly affected in people with severe mental illness Common physical comorbidities in people with severe mental illness Cardiovascular disease in people with severe mental illness Problematic behaviours affecting health in people with severe mental illness How to use the Health Improvement Profile (physical health check tool) Changing behaviour to improve health Appendix 1: Health Improvement Profile (HIP) – Female Appendix 2: Health Improvement Profile (HIP) – Male "Investigative Journalism means the unveiling of matters that are concealed either deliberately by someone in a position of power, or accidentally, behind a chaotic mass of facts and circumstances - and the analysis and exposure of all relevant facts to the public. In this way investigative journalism crucially contributes to freedom of expression and freedom of information, which are at the heart of UNESCO's mandate. The role media can play as a watchdog is indispensable for democracy and it is for this reason that UNESCO fully supports initiatives to strengthen investigative journalism throughout the world. I believe this publication makes a significant contribution to promoting investigative journalism and I hope it will be a valuable resource for journalists and media professionals, as well as for journalism trainers and educators." -- J?nis K?rklínš, Assistant Director-General for Communication and Information, UNESCO, Preface, page 1. "This report presents an evaluation of the current methods used to generate air emissions information from all freight transportation activities and discusses their suitability for purposes such as health and climate risk assessments, prioritization of emission reduction activities (e.g., through State Implementation Plans), and public education. The report is especially valuable for (1) its identification of the state of the practice, gaps, and strengths and limitations of current emissions data estimates and methods and (2) its conceptual model that offers a comprehensive representation of freight activity by all transportation modes and relationships between modes. This report will better inform the near-term needs of public and private stakeholders regarding the quality of emissions data and guide future research that links freight activities with air emissions."--pub. desc. Depersonalization and Creative Writing: Unreal City explores the common psychological symptom of depersonalization, its influence on literature and the insights it can provide into the writing process. Depersonalization is a distressing symptom in which sufferers feel detached from their own selves and the world. Often associated with psychological disorders, it can also affect healthy people at times of stress. Beginning with a first-hand account of the experience, the book goes on to argue that many well-known literary texts, including Camus's *The Outsider* and Sartre's *Nausea*, evoke a similar psychological state. It shows how a concept of depersonalized writing can be found in the work of literary theorists from widely different traditions, including T.S. Eliot, Roland Barthes and Viktor Shklovsky. Finally, it maintains that creative writers can make use of the lessons learned from a study of depersonalization to arrive at a deeper understanding of writing. Given this knowledge, the controversial writing teacher's maxim show, don't tell, so often misapplied or misunderstood, can be repurposed as a practical instruction for taking students' writing to a new level of sophistication and wisdom. This manual provides guiding principles for the use of patent data in the context of S&T measurement, and recommendations for the compilation and interpretation of patent indicators in this context. The RAF's rugged twin-rotor Chinook support helicopter has been involved in most of the UK's military operations stretching back to the Falklands Conflict, Northern Ireland and in both Gulf Wars, to peacekeeping in Bosnia, operations in Kosovo, the evacuation of Sierra Leone, and most recently its high profile missions in Afghanistan. Author Chris McNab has been given full access by the RAF to its Chinook helicopters and crews to give an unprecedented insight into their operation and maintenance, fully illustrated with a stunning selection of photographs and technical drawings. Highly Commended, BMA Medical Book Awards 2015 In 2008, Paul Farmer and Jim Yong Kim described global surgery as the "neglected stepchild" of healthcare, and now leaders from around the world are working to redefine it as a human right through the Lancet Commission on Global Surgery. In order to help advance global surgery and anesthesia as a public "International Financial Reporting Standards (IFRSs) are being increasingly used by companies throughout the world. All entities listed in the EU have been required to issue financial statements under IFRS since 2005, and more and more other countries are making the change to IFRS including the US and Canada. ... The Manual is packed full of clear, practical guidance on how to prepare financial statements in accordance with IFRS. It includes hundreds of practical worked examples and extracts from company reports as well as model IFRS financial statements that help to illustrate the explanations and show exactly how even the most complex calculations and disclosures should be made."--Cover. Apple gives macOS new features and improvements right on your desktop and under the hood with Catalina—aka OS X 10.15. With this updated guide, you'll learn how to use your iPad as a second screen, work with iPad apps on your Mac, and use Screen Time on your Mac. This new edition of the #1 bestselling Mac book shows you how to use the revamped apps for Music, Podcasts, and TV. Loaded with illustrations, step-by-step instructions, tips, and tricks, this book from David Pogue—Missing Manual series creator, New York Times columnist, and Emmy-winning tech correspondent for CNBC, CBS, and NPR—covers everything Catalina has to offer with lots of humor and technical insight.
