Economics in One Lesson Nov 05 2020 With over a million copies sold, Economics in One Lesson is an essential guide to the basics of economic theory. A fundamental influence on modern libertarianism, Hazlitt defends capitalism and the free market from economic myths that persist to this day. Considered among the leading economic thinkers of the "Austrian School," which includes Carl Menger, Ludwig von Mises, Friedrich (F.A.) Hayek, and others, Henry Hazlitt (1894-1993), was a libertarian philosopher, an economist, and a journalist. He was the founding vice-president of the Foundation for Economic Education and an early editor of The Freeman magazine, an influential libertarian publication. Hazlitt wrote Economics in One Lesson, his seminal work, in 1946. Concise and instructive, it is also deceptively prescient and far-reaching in its efforts to dissemble economic fallacies that are so prevalent they have almost become a new orthodoxy. Economic commentators across the political spectrum have credited Hazlitt with foreseeing the collapse of the global economy which occurred more than 50 years after the initial publication of Economics in One Lesson. Hazlitt's focus on non-governmental solutions, strong — and strongly reasoned — anti-deficit position, and general emphasis on free markets, economic liberty of individuals, and the dangers of government intervention make Economics in One Lesson every bit as relevant and valuable today as it has been since publication.

Competencias docentes del profesorado universitario Apr 30 2020 Quality and professional development - The thesis of this book is that the University develops a formative task at the higher levels as required, in order to be effective, with regard to institutional conditions as well as the capacitation of their personnel. The formative mission of each university institution is concretized and carried out in its curricular offer and its quality of formation, for its part, it will depend in good measure on the performance of the teachers. Today it is beyond doubt that good teaching requires command of different competencies on the part of the teachers of each faculty or school. The “university curriculum”, the “teaching skills” and the “analysis of the teaching quality” are the three big parts in the book. Ten competencies that summarize the most important aspects of the university professors’ activity are analysed. Competencies that can serve as a mark of reference for a possible program of qualification of the university professors.
