The Democrats Oct 29 2022 "A smart, readable history of the Democrats that reminds us of the party's allegiance to capital."—Independent [A Critical History of New Music in China](#) Oct 24 2019 By the end of the nineteenth century, Chinese culture had fallen into a stasis, and intellectuals began to go abroad for new ideas. What emerged was an exciting musical genre that C. C. Liu terms "new music." With no direct ties to traditional Chinese music, "new music" reflects the compositional techniques and musical idioms of eighteenth- and nineteenth-century European styles. Liu traces the genesis and development of "new music" throughout the twentieth century, deftly examining the social and political forces that shaped "new music" and its uses by political activists and the government.

[Modern Architecture: A Critical History \(World of Art\)](#) Jun 12 2021 An extensively revised and updated edition of a bestselling classic on modern architecture and its origins by Kenneth Frampton. Kenneth Frampton's highly acclaimed survey of modern architecture and its origins has been a classic since it first appeared in 1980. Starting with the cultural developments since 1750 that drove the modern movement, moving through the creation of modern architecture, and exploring the effects of globalization and the phenomenon of international celebrity architects, this book is the definitive history of modern architecture. For this extensively revised and updated fifth edition of *Modern Architecture*, Frampton added new chapters exploring the ongoing modernist tradition in architecture while also examining the varied responses to the urgent need to build more sustainably and create structures that will withstand changing climates. This new edition features completely redesigned interiors and an updated and expanded bibliography, making this volume more indispensable than ever.

A Critical History of Television's The Twilight Zone, 1959–1964 Jan 20 2022 Rod Serling's anthology series *The Twilight Zone* is recognized as one of the greatest television shows of all time. Always intelligent and thought-provoking, the show used the conventions of several genres to explore such universal qualities as violence, fear, prejudice, love, death, and individual identity. This comprehensive reference work gives a complete history of the show, from its beginning in 1959 to its final 1964 season, with critical commentaries, incisive analyses, and the most complete listing of casts and credits ever published. Biographical profiles of writers and contributors are included, followed by detailed appendices, bibliography and index.

[The Culture of Connectivity](#) Nov 05 2020 *The Culture of Connectivity* tells the full story of the rise of social media in the first decade of the twenty-first century up to the present, providing both a historical and a critical analysis of the emergence of major platforms in the context of a rapidly changing ecosystem of connective media. platforms such as Facebook, Twitter, Flickr, YouTube, and Wikipedia.

[Storyboarding](#) Nov 17 2021 This study provides the first book-length critical history of storyboarding, from the birth of cinema to the present day and beyond. Capitalism and Its Economics Dec 07 2020 This classic book is an ideal introduction to economic thought and the dominance of capitalism, ideal for students of economic theory and history. Now thoroughly revised and updated, this new edition includes a new preface and an additional chapter by the author. Analysing the relationship between economic thought and capitalism from 1750 to the present, Douglas Dowd examines the dynamic interaction of two processes: the historical realities of capitalism and the evolution of economic theory. He demonstrates that the study of economics celebrates capitalism in ways that make it necessary to classify economic science as pure ideology. A thoroughly modern history, this book shows how economics has become ideology. A radical critic of capitalism, Dowd surveys its detrimental impact across the globe and throughout history. The book includes biographical sketches and brief analyses of the major proponents and critics of capitalism throughout history, including Adam Smith, Thomas Malthus, Jeremy Bentham, John Stuart Mill, Karl Marx, Thorstein Veblen, Rosa Luxemburg, John Maynard Keynes, Paul Samuelson, Milton Friedman, and Eric Hobsbawm.

[Power and Politics in World Athletics](#) Jan 26 2020 This book provides the first detailed history of one of the most powerful international sport organisations, the International Association of Athletics Federations (IAAF), since 2019 known as World Athletics. The book critically assesses the internal power relations within the IAAF by focusing on the IAAF leadership. Based on extensive archival research, *Power and Politics in World Athletics* offers a nuanced analysis of the institutionalised strategies that developed as a reflection of the IAAF's interests and aims to create a broader understanding of the global sport system. With only six presidents in over a century of existence, the IAAF's leaders had profound impacts on other international institutions, national stakeholders and sporting participants. Through four sections, the book identifies various key turning points in the history of the governing body of athletics, and explores the IAAF's foundation, the policies of past IAAF presidents, and controversial issues such as doping, corruption and manipulation through a socio-historical lens. The book shows that while anyone could take part in athletics, policies enacted by each president served to ostracize those groups who did not fit into the IAAF's vision of an equal playing field. This book is essential reading for anyone with an interest in sport history, sport sociology, the politics of sport, sport management, sport governance, or international organisations.

[A Critical History of Financial Crises](#) Feb 06 2021 "While each financial crisis is unique and has its own special features, there are a lot of similarities in the dynamics leading to a crisis and also in their resolutions. Some of the financial crises are caused by the lack of appropriate regulation, but often the regulators were ignoring the signals of imminent crises, while serving implicitly or explicitly, the financial industry. In his book, Prof. Kedar-Levy is providing a fresh look at many famous financial crises around the globe, analysing their causes and effects. The special role of regulators is highlighted, including the "Capture Theory" in practice. This book is suitable for economist as well as for those interested in economic history, and for all those concerned with the stability of current international financial markets. The Psychology of Teaching Critical History Aug 15 2021 This book delves into the psychology of teaching and learning history. It provides insight into the cognitive processes by which individuals imbibe history and how identity associations can shape our interpretation of histories. It assimilates concepts such as political scenario, curriculum, and pedagogy to give a holistic understanding of the processes involved in the learning of history. It discusses various themes such as the instrumentality of history in nation-building; psychological features and development of Historical Understanding; and the marginalisation of community history. It also provides suggestions on how teachers can reconcile with the developmental stages and multiple versions of history, while teaching tolerance and acceptance without compromising on nation-building commitments. An important contribution, this volume will be indispensable for students and researchers of education, history, psychology, and educational psychology. It will also be of interest to historians, teachers and teacher educators.

A Critical History and Philosophy of Psychology Dec 31 2022 Presents a fresh perspective that explores the development of psychology as both a human and a natural science.

Technology Mar 22 2022 In modern life, technology is everywhere. Yet as a concept, technology is a mess. In popular discourse, technology is little more than the latest digital innovations. Scholars do little better, offering up competing definitions that include everything from steelmaking to singing. In *Technology: Critical History of a Concept*, Eric Schatzberg explains why technology is so difficult to define by examining its three thousand year history, one shaped by persistent tensions between scholars and technical practitioners. Since the time of the ancient Greeks, scholars have tended to hold technicians in low esteem, defining technical practices as mere means toward ends defined by others. Technicians, in contrast, have repeatedly pushed back against this characterization, insisting on the dignity, creativity, and cultural worth of their work. The tension between scholars and technicians continued from Aristotle through Francis Bacon and into the nineteenth century. It was only in the twentieth century that modern meanings of technology arose: technology as the industrial arts, technology as applied science, and technology as technique. Schatzberg traces these three meanings to the present day, when discourse about technology has become pervasive, but confusion among the three principal meanings of technology remains common. He shows that only through a humanistic concept of technology can we understand the complex human choices embedded in our modern world.

Assimilate Aug 27 2022 "Industrial" is a descriptor that fans and critics have applied to a remarkable variety of music: the oil drum pounding of Einstürzende Neubauten, the processed electronic groans of Throbbing Gristle, the drumloop clatter of Skinny Puppy, and the synthpop songcraft of VNV Nation, to name just a few. But the stylistic breadth and subcultural longevity of industrial music suggests that the common ground here might not be any one particular sound, but instead a network of ideologies. This book traces industrial music's attitudes and practices from their earliest articulations--a hundred years ago--through the genre's mid-1970s formation and its development up to the present and beyond. Taking cues from radical intellectuals like Antonin Artaud, William S. Burroughs, and Guy Debord, industrial musicians sought to dismantle deep cultural assumptions so thoroughly normalized by media, government, and religion as to seem invisible. More extreme than punk, industrial music revolted against the very ideas of order and reason: it sought to strip away the brainwashing that was identity itself. It aspired to provoke, bewilder, and roar with independence. Of course, whether this revolution succeeded is another question... *Assimilate* is the first serious study published on industrial music. Through incisive discussions of musicians, audiences, marketers, cities, and songs, this book traces industrial values, methods, and goals across forty years of technological, political, and artistic change. A scholarly musicologist and a longtime industrial musician, S. Alexander Reed provides deep insight not only into the genre's history but also into its ambiguous relationship with symbols of totalitarianism and evil. Voicing frank criticism and affection alike, this book reveals the challenging and sometimes inspiring ways that industrial music both responds to and shapes the world. *Assimilate* is essential reading for anyone who has ever imagined limitless freedom, danced alone in the dark, or longed for more noise.

Space Forces Jan 08 2021 The radical history of space exploration from the Russian Cosmists to Elon Musk Many societies have imagined going to live in space. What they want to do once they get up there - whether conquering the unknown, establishing space "colonies," privatising the moon's resources - reveals more than expected. In this fascinating radical history of space exploration, Fred Scharmen shows that often science and fiction have combined in the imagined dreams of life in outer space, but these visions have real implications for life back on earth. For the Russian Cosmists of the 1890s space was a place to pursue human perfection away from the Earth. For others, such as Wernher Von Braun, it was an engineering task that combined, in the Space Race, the Cold War, and during World War II, with destructive geopolitics. Arthur C. Clark in his speculative books offered an alternative vision of wonder that is indifferent to human interaction. Meanwhile NASA planned and managed the space station like an earthbound corporation. Today, the market has arrived into outer space and exploration is the plaything of superrich technology billionaires, who plan to privatise the mineral wealth for themselves. Are other worlds really possible? Bringing these figures and ideas together reveals a completely different story of our relationship with outer space, as well as the dangers of our current direction of extractive capitalism and colonisation.

Entitled Jun 24 2022 "A proudly partisan history of the British aristocracy - which scores some shrewd hits against the upper class themselves, and the nostalgia of the rest of us for their less endearing eccentricities. A great antidote to *Downton Abbey*." (Mary Beard) Exploring the extraordinary social and political dominance enjoyed by the British aristocracy over the centuries, *Entitled* seeks to explain how a tiny number of noble families rose to such a position in the first place. It reveals the often nefarious means they have employed to maintain their wealth, power and prestige and examines the greed, ambition, jealousy and rivalry which drove aristocratic families to guard their interests with such determination. In telling their history,

Entitled introduces a cast of extraordinary characters: fierce warriors, rakish dandies, political dilettantes, charming eccentrics, arrogant snobs and criminals who quite literally got away with murder.

Thinking Differently about Leadership Aug 22 2019 This book is a critical historical analysis of leadership thought in the Western tradition, examining Classical Greek, medieval and modern social scientific theories of leadership, focussing on the assumptions and effects which arise from these ways of understanding leadership and offering a new basis for leadership theory-building.

A Critical History of Doctor Who on Television Apr 22 2022 Since its inception in November 1963, the British science fiction television series Doctor Who has exerted an enormous impact on the world of science fiction (over 1,500 books have been written about the show). The series follows the adventures of a mysterious "Time Lord" from the distant planet Gallifrey who travels through time and space to fight evil and injustice. Along the way, he has visited Rome under the rule of Nero, played backgammon with Kublai Khan, and participated in the mythic gunfight at the O.K. Corral.

Predating the Star Trek phenomenon by three years, Doctor Who seriously dealt with continuing characters, adult genre principles and futuristic philosophies. Critical and historical examinations of the ideas, philosophies, conceits and morals put forth in the Doctor Who series, which ran for 26 seasons and 159 episodes, are provided here. Also analyzed are thematic concepts, genre antecedents, the overall cinematography and the special effects of the long-running cult favorite. The various incarnations of Doctor Who, including television, stage, film, radio, and spin-offs are discussed. In addition, the book provides an extensive listing of print, Internet, and fan club resources for Doctor Who.

Competing Voices Jul 02 2020 "Shunning boosterism, this history of Stockton California seeks to present a critical and candid account of a tent city during the Gold Rush that grew into a metropolis larger than either Pittsburgh or Cincinnati. It begins with the Yokut and Miwok tribes of the San Joaquin and moves forward to the present day, highlighting along the way the city's "golden age" during the Roaring Twenties and its unique, even crucial, roles during the Civil War, the Great War, and the Second World War. It does not ignore movers and shakers like city manager Walter Byron Hogan, local industrialists such as Tillie Lewis, and real estate developers such as the billionaire Alex Spanos. However, it also tells the stories of ordinary citizens who did extraordinary things -- a transvestite woman who worked for a local newspaper during the Gilded Age and stowed away on a troop ship to the Philippines in 1898, a high school teacher who refused to abandon her Japanese students when they were imprisoned in 1942 at the county fairgrounds and was later honored by the Emperor of Japan, a brilliant Jewish humanities professor who inspired so many of his students, including jazz composer Dave Brubeck. Seeking to be inclusive, this history takes pains to acknowledge the contributions of Native Americans, Chinese, and Italian immigrants, Filipino/as, Japanese Americans, African Americans, Mexican Americans, Sikhs, gays and lesbians, and women. Everyone is given a voice." -- cover, p.[4].

Nineteenth Century Art Dec 19 2021 "This is a radical reconsideration of the origins of modern painting and sculpture in Europe and North America. In art, as in nearly every other field, the nineteenth century was a time of questioning, experimentation, discovery and modernization. Artists divined and portrayed, as never before, the crucial connections between seeing and knowing, vision and society. From Goya to Blake, from Courbet to Eakins, from Cassatt to Cezanne, from Van Gogh to Ensor, they challenged the prevailing definitions of art and the social order." "Nineteenth Century Art: A Critical History embraces many aspects of the so-called "new" art history - attention to issues of class and gender, reception and spectatorship, racism and Eurocentrism - while emphasizing the remarkable vitality, salience and subversiveness of the era's best art. Indeed, the authors insist that there is a profound sympathy between these new methods and the art under examination. For it was nineteenth-century artists who first addressed the issues that preoccupy audiences and scholars today: the relation between popular and elite culture, the legacy of the Enlightenment, the question of the canon, and the representation of women and non-European peoples." "This rich and diverse volume suggests that nineteenth-century art remains compelling today because its critical insights have rarely been surpassed. It will prove of interest not only to the specialist, but to anyone fascinated by the art, history and culture of this unique era."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. A Critical History of German Film Apr 30 2020 A history of German film dealing with individual films as works of art has long been needed. Existing histories tend to treat cinema as an economic rather than an aesthetic phenomenon; earlier surveys that do engage with individual films do not include films of recent decades. This book treats representative films from the beginnings of German film to the present. Providing historical context through an introduction and interchapters preceding the treatments of each era's films, the volume is suitable for semester- or year-long survey courses and for anyone with an interest in German cinema.BR> The films: The Student of Prague - The Cabinet of Dr. Caligari - The Last Laugh - Metropolis - The Blue Angel - M - Triumph of the Will - The Great Love - The Murderers are Among Us - Sun Seekers - Trace of Stones - The Legend of Paul and Paula - Solo Sunny - The Bridge - Young Törless - Aguirre, The Wrath of God - Germany in Autumn - The Marriage of Maria Braun - The Tin Drum - Marianne and Juliane - Wings of Desire - Maybe, Maybe Not - Rossini - Run Lola Run - Good Bye Lenin! - Head On - The Lives of Others Stephen Brockmann is Professor of German at Carnegie Mellon University and president-elect of the German Studies Association. Modern Architecture May 12 2021 This acclaimed survey of modern architecture and its origins has become a classic since it first appeared in 1980. For the fourth edition Kenneth Frampton has added a major new section that explores the effects of globalization on architecture in recent years and examines the phenomenon of international celebrity architects who are increasingly active all over the world. The bibliography has been updated and expanded, making this volume more complete and indispensable than ever.

A Critical History of the Economy Feb 27 2020 Drawing on recent debates in critical International Political Economy, this book mobilizes the idea that the economy does not exist separately from society and politics to develop a detailed intellectual history of how the economy came to be seen as an independent domain. In contrast to typical approaches to writing the history of economic thought, which assume the reality of the economy, the author describes the forms of intellectual argument that made it possible to conceive of the national and international economies as objects of intellectual inquiry. At the centre of this process was the analytical separation of power and wealth. Walter thus offers a broad historical perspective on the emergence of current IPE theory, while linking the field with contextualist intellectual history. This important and innovative volume will be of strong interest to students and scholars of International Political Economy, International Relations, Economics, History and Political Theory.

Sex Addiction Dec 27 2019 The concept of sex addiction took hold in the 1980s as a product of cultural anxiety. Yet, despite being essentially mythical, sex addiction has to be taken seriously as a phenomenon. Its success as a purported malady lay with its medicalization, both as a self-help movement in terms of self-diagnosis, and as a rapidly growing industry of therapists treating the new disease. The media played a role in its history, first with TV, the tabloids and the case histories of claimed celebrity victims all helping to popularize the concept, and then with the impact of the Internet. This book is a critical history of an archetypically modern sexual syndrome. Reay, Attwood and Gooder argue that this strange history of social opportunism, diagnostic amorphism, therapeutic self-interest and popular cultural endorsement is marked by an essential social conservatism: sex addiction has become a convenient term to describe disapproved sex. It is a label without explanatory force. This book will be essential reading for those interested in sexuality studies, contemporary history, psychology, psychiatry, sociology, media studies and studies of the Internet. It will also be of interest to doctors and therapists currently working in this and related fields.
