Learn the requirements needed to instill safety and stability in existing and historic buildings - without requiring full compliance with the new construction requirements in the building code. The 2015 INTERNATIONAL EXISTING BUILDING CODE LOOSE LEAF contains requirements intended to encourage the use and reuse of existing buildings by covering important topics such as repairs, alterations, additions, and changes of occupancy, making this an ideal addition to a user's code products. Chapter changes in this updated code include requirements related to the addition of sleeping units and dwelling units as they relate to the requirements for Accessible units, and Type A units and Type B units have been moved to Chapter 11 on Additions. The Uniform Building Code is one of the most widely adopted model building codes in the world and is a proven document meeting the needs of government units charged with enforcement of building regulation. The most recent edition, published in 1997, provides complete regulations covering all major aspects of building design and construction relating to fire and life safety and structural safety. The provisions of the 1997 Uniform Building Code were published in three volumes to help building inspectors, plans examiners, architects and structural designers locate provisions applicable to their respective fields without the need to search through all provisions. The two most popular volumes, 1 and 2, are now available from Delmar Learning. Volume 1 contains the administrative, fire- and life-safety, and field inspection provisions, including all nonstructural provisions and those structural provisions necessary for field inspections. "A member of the International Code Family." Searchable electronic version of print product with fully hyperlinked cross-references. The 2015 INTERNATIONAL FUEL GAS CODE SOFT COVER sets forth requirements that address the design and installation of fuel gas systems and gas-fired appliances, based on the most current information and technology available. The requirements are performance-driven, making this an effective tool and valuable addition to a user's code products. In this updated code, the section on protection of piping has been completely rewritten, and readers are informed that line regulators installed in rigid piping must have a union installed to allow removal of the regulator. The 2019 Edition of the California Plumbing Code© (CPC) contains plumbing design and construction standards. Provisions contained in the CPC provide minimum standards to safeguard life or limb, health, property and public welfare. It also protects against hazards that may arise from the use of plumbing piping and systems by regulating and controlling the design, construction, installation, quality of materials, location and operation of plumbing piping systems within the State of California. "This document is Part 2.5 of thirteen parts of the official triennial compilation and publication of the adoptions, amendments and repeal of administrative regulations to California Code of Regulations, Title 24, also referred to as the California Building Standards Code. This UFC applies to the design and construction of new and renovated Government-owned facilities for the Department of Defense (DoD). It is applicable to all methods of project delivery and levels of construction. Includes a list of applicable NIST cybersecurity publications for consideration. Why buy a book you can download for free? First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least

an hour. An engineer that's paid \$75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than \$10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com This book is published by 4th Watch Books and includes copyright material. This code applies to all buildings except detached one- and two-family dwellings and townhouses up to three stories. The 2018 IBC contains many important changes such as: Accessory storage spaces of any size are now permitted to be classified as part of the occupancy to which they are accessory. New code sections have been introduced addressing medical gas systems and higher education laboratories. Use of fire walls to create separate buildings is now limited to only the determination of permissible types of construction based on allowable building area and height. Where an elevator hoistway door opens into a fire-resistance-rated corridor, the opening must be protected in a manner to address smoke intrusion into the hoistway. The occupant load factor for business uses has been revised to one occupant per 150 square feet. Live loads on decks and balconies increase the deck live load to one and one-half times the live load of the area served. The minimum lateral load that fire walls are required to resist is five pounds per square foot. Wind speed maps updated, including maps for the state of Hawaii. Terminology describing wind speeds has changed again with ultimate design wind speeds now called basic design wind speeds. Site soil coefficients now correspond to the newest generation of ground motion attenuation equations (seismic values). Five-foot tall wood trusses requiring permanent bracing must have a periodic special inspection to verify that the required bracing has been installed. New alternative fastener schedule for construction of mechanically laminated decking is added giving equivalent power-driven fasteners for the 20-penny nail. Solid sawn lumber header and girder spans for the exterior bearing walls reduce span lengths to allow #2 Southern Pine design values. The 7th Edition (2020) update to the Florida Building Code: Residential is a fully integrated publication that updates the 6th Edition 2017 Florida Building Code: Residential using the latest changes to the 2018 International Residential Code® with customized amendments adopted statewide. Florida Building Code Administrative Chapter 1 is included. Chapter tabs are also included. Effective Date: December 31, 2020
