He spends most of his time goggled in to the Metaverse, where his avatar is legendary. But in the club known as The Black Sun, his fellow hackers are being felled by a weird new drug called Snow Crash that reduces them to nothing more than a jittering cloud of bad digital karma (and IRL, a vegetative state). Investigating the Infocalypse leads Hiro all the way back to the beginning of language itself, with roots in an ancient Sumerian priesthood. World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress. Super Mario 3D World + Bowser's Fury's is out on Nintendo Switch, the former being a port of one of the Wii U's best titles. The latter is more interesting though. It's an open world 3D platforming adventure more akin to Super Mario Odyssey (but on a larger scale), set in Lake Lapcat. Your main foe is Fury Bowser who emerges every now and then to cause havoc. There's a lot more to Bowser's Fury than meets the eye, however. In total, there are 100 Cat Shines to collect with each island in Lake Lapcat having five. If you can find any new Shines after clearing an island, try coming back later - a new objective should become available and offer some hints. As such, you should always be open to exploring other islands as they open up (which is what happens when Fury Bowser is defeated). You'll notice a Cat Shine flying to a tower when collected - travel to the top of the tower and ground-pound the shiny bit to get a power-up. Since you can store up to five of each power-up, these can be especially useful for filling out your inventory. Collecting a Shine will provide a power-up on a tower each time, though keep in mind that this stops once five Cat Shines has been obtained on an island. As for Fury Bowser, he'll come up every now and then, his appearances increasing in frequency as you collect more Cat Shines. Collecting a Shine will immediately make him go away and deplete his health for the next fight. He'll eventually leave if you survive for long enough so keep that in mind if there no Shines nearby. Also worth noting is that certain boxes can only be opened by Fury Bowser. Stand near them and once he uses his flame breath, they'll be destroyed. These boxes can contain Shines so worth the effort of trying to stay alive. Upon gathering a certain number of Cat Shines, the Giga Cat Bells become available. Use these to turn into Giga Cat Mario and take on Fury Bowser. Just keep in mind that taking a hit will transform you back to regular Mario. You're still giant -sized so Bowser can still be beaten (at least in the early going) but gathering another Giga Cat suit is as easy as going back to the Giga Cat Bell again. Finally, you won be able to collect all of the Cat Shines before the final encounter with Fury Bowser. When the last fight is wrapped up, return to Lake Lapcat and speak to Bowser Jr. He'll clue you in on the remaining Shines and their locations. In Flatland, A Square's linear world is invaded by a Sphere bringing the gospel of the third dimension. Part geometry lesson, part social satire, the novel enlarges readers' imaginations beyond the limits of our 'respective dimensional prejudices'. This book discusses the TRIPs Agreement, the Madrid Protocol and other international conventions, and compares the basic principles of U.S. law with Asian & European law.
